

# COMPANY PROFILE

# COMPANY INTRODUCTION

## **LUBRITECH MANUFACTURING**

specialises in the management and control of Hydrocarbon Contamination at the source. The added values of our products are decreased contamination in process circuits and increased mineral recovery.

We are committed to service excellence and pride ourselves on providing and implementing innovative solutions to solve our customer's problems.

We constantly strive to implement the latest technology and work with industry professionals to develop new products that have the potential to set new industry standards.

We develop all our products with an unmatched Safety and Environmental consciousness.

## VISION STATEMENT:

**LUBRITECH MANUFACTURING** aims to be a market leader by providing and developing specialised, innovative, environmentally safe and cost effective products to the global industrial, mineral & mining sector.

## MISSION STATEMENT:

**LUBRITECH MANUFACTURING's** mission is to provide global solutions for the elimination of hydrocarbon contamination. To provide our customers with the most practicable and economical solutions using the latest technologies and products to optimise our clients processes. We aim to provide service excellence through dedication, integrity and ethical conduct.

# MANAGEMENT TEAM & EXPERIENCE

**LUBRITECH MANUFACTURING** is a Level 2 B-BBEE company.

Our Team has years of experience in providing solutions to Industrial and Corporate companies.

We work with a team of skilled engineers across all disciplines that collectively have decades of experience in the design and implementation of mineral processing plants.

Our understanding of global standards and logistics, compliment our ability to successfully and competitively deliver products internationally.

The experience, knowledge, accountability and pro-active nature of our Team is paramount to our growth and testament to the value-added service delivery to our clients.

# WHY US?

## BECAUSE WE DO NOT JUST SELL YOU A PRODUCT...

### DETERGENT PRODUCT RANGE:

We specialise in Hydrocarbon Contamination Solutions.  
We manage and control contamination at the source.

By conducting test work it can be proven that our products will not have a negative effect on your process circuit when used at workshops above & underground.

### REAGENT PRODUCT RANGE:

By conducting test work, it is metallurgically proven that our reagents can improve Ultra Fines and overall Flotation Recovery & Grade. In collaboration with our clients we will provide a solution that will maximise their profitability.

# PRODUCTS

## HTech (Hydrocarbon Contamination Treatment)

**HTech** renders hydrocarbons inert to an environmentally friendly Organo-silicate. It is environmentally safer to use than detergent, degreasers and solvent based products.

## ETech (Equipment Cleaner)

**ETech** has been blended to work as an equipment/engine cleaner that is applied by using a high pressure system. It renders the hydrocarbons inert at source.

## MTech (Mechanical Parts & General Degreaser)

**MTech** is water based and biodegradable and has been formulated and designed to clean Mechanical Parts and can be used as a general degreaser.

## DisFlo Range (Reagent)

**DisFlo** Reagent has been formulated and designed to improve the recovery & grade of most metallurgical commodities that use flotation as a concentration method.
